Water Supply

Axially Split Volute Casing Pump

Omega / Omega V

Main applications

- Waterworks
- Desalination plants
- Pressure boosting
- Water transport
- Service water and cooling water for power stations and industry
- Irrigation pumping stations
- Drainage pumping stations
- Fire-fighting systems
- Shipbuilding
- District heating systems and district cooling systems

Fluids handled

OMEGA / OMEGA V pumps are designed for pumping water and other fluids with a low solids content. The pumps are very versatile and can be used for the following fluids, for example:

- Brackish water
- River water, lake water and groundwater
- Stormwater
- Service water
- Fire-fighting water
- Cooling water
- Condensate
- Heating water
- Drinking water

Operating data

Table 1: Operating properties

Characteristic	Value	
Size	DN [mm]	80-400
	DN ["]	3-15
Flow rate ¹⁾	Q [m ³ /h]	≤ 4400
	Q [US.gpm]	≤ 19375
Head ²⁾	H [m]	≤ 210
	H [ft]	≤ 689
Operating pressure ²⁾	p [bar]	≤ 25
	p [psi]	≤ 363
Fluid temperature ³⁾	T [°C]	0 to 140
	T [°F]	32 to 284

Designation

Example: Omega V 150 - 460 A GB P M

Table 2: Designation key

Code	Description	
Omega	Type series	
V	Design	
	⁴⁾	Horizontal installation
	V	Vertical installation
150	Nominal discharge nozzle diameter [mm]	
460	Nominal impeller diameter [mm]	
A	Impeller type	
GB	Material variant (⇒ Page 6)	
	GB	Grey cast iron / bronze
	GC	Grey cast iron / chrome steel
	SB	Nodular cast iron / bronze
	SC	Nodular cast iron / chrome steel
	DD ₃₅	Duplex stainless steel / duplex stainless steel
P	Shaft seal	
	P	Gland packing
	G	Mechanical seal
M	Bearing lubrication	
	F	Grease
	M	Fluid handled

Design details

Design

- Volute casing pump
- Horizontal installation / vertical installation
- Single-stage
- Nominal discharge nozzle diameter: 80 mm - 400 mm

¹ For larger flow rates see type series RDLO / RDLOV

² Depending on the material and size

³ Standard design up to 80 °C [176 °F] max.

⁴ Blank

Pump casing

- Axially split volute casing
- Volute casing with integrally cast pump feet
- Replaceable casing wear rings
- Mating dimensions to EN or ASME

Impeller type

- Double-entry radial impeller⁵⁾

Pump shaft

- Completely dry shaft
- Shaft protecting sleeves in the seal area

Shaft seal

- Gland packing
- Mechanical seal

Bearings

For horizontal installation:

- Grease-packed rolling element bearings sealed for life

For vertical installation:

- Product-lubricated plain bearing at the bottom / rolling element bearings, greased for life, on top

⁵ Optionally with impeller wear rings

Materials

B2-E ¹²⁾	–	–	–	–	X	Polyurethane base paint, colour RAL 5002 (ultramarine blue) ¹⁶⁾	None; sand-blasted SA 2 ½	Polyurethane base paint, colour RAL 5002 (ultramarine blue) ¹⁶⁾	Polyurethane base paint, colour RAL 5002 (ultramarine blue) ¹⁶⁾

¹²⁾ Only permissible for fluid temperatures ≤ 80 °C [176 °F]

¹³⁾ For indoor use in industry and in a marine atmosphere; other colours only in coating variants A2, B2 and on request.

¹⁴⁾ Extra charge

¹⁵⁾ Approved for drinking water (KTW, DVGW, ACS). The impeller and rotor components are not coated. No other colours available. Max. permissible temperature for drinking water approved coating 60 °C [140 °F]. Only approved for drinking water up to 25 °C [77 °F] max.

¹⁶⁾ For indoor use and outdoor use in industry and in a marine atmosphere; other colours are available on request.

Product benefits

- Low maintenance costs:
 - Fast and easy to install thanks to self-centring components (upper casing part, rotor, casing cover)
 - Materials resistant to corrosion and abrasion
 - Smooth operation with low vibration levels
 - Replacement and spare parts fit several pump sizes
- Long service life:
 - Sealed and dry shaft
 - Short bearing distances and a short shaft
 - Optional impeller wear rings
 - Replaceable shaft protecting sleeve
- High operating reliability:
 - Rigid shaft without threads between the bearings
 - Generously sized bearings ($L_{h_{10}} = 100,000$ hours)
 - Reliable sealing thanks to solid casing split flange
 - Double-entry impeller for axial thrust balancing
 - Double volute design
- High flexibility:
 - Drive can be positioned to the left or right of the pump
 - Shaft sealed by gland packing or mechanical seals
 - Various horizontal and vertical installation options
 - Flanges to DIN or ASME
- Excellent efficiencies and NPSH values:
 - Computer-optimised impellers
 - Large impeller inlet diameters for optimum suction behaviour
 - Cost-effective replacing of casing and impeller wear rings
 - Vortex-free intake elbow with low energy losses
 - Impeller trimmed to match the specified duty point
 - Several hydraulic systems per pump size

Acceptance inspections/tests

- Functional and acceptance tests
 - For information on acceptance tests and inspections refer to the QCPs (see KSB Standard ZN56555-1A / ZN56555-1B / ZN56555-1C)
- Quality assurance system
 - DIN ISO 9001 / EN 29001

Selection information

Solids content

Table 7: Solids content by shaft seal and material variant in [ppm] or [mg/l]

Shaft seal	Material variant					
	Max. permissible solids content for variants with barrier and flushing water line without cyclone separator			Max. permissible solids content for variants with barrier and flushing water line with cyclone separator ¹⁷⁾		
	Grey cast iron (GB/GC)	Nodular cast iron (SB/SC)	Cast steel (DD ₃₅)	Grey cast iron (GB/GC)	Nodular cast iron (SB/SC)	Cast steel (DD ₃₅)
Gland packing	50	50	50	100	100	100
Unbalanced mechanical seal	50	50	50	100	100	100
Balanced mechanical seal	50	50	50	100	100	100

Directions of rotation and flow

Table 8: Directions of rotation and flow

Horizontal installation		Vertical installation	
Direction of rotation when looking at the shaft stub "left"= anti-clockwise	Direction of rotation when looking at the shaft stub "right"= clockwise	Direction of rotation when looking at the shaft stub "left"= anti-clockwise	Direction of rotation when looking at the shaft stub "right"= clockwise

The pumps are designed symmetrically, which means that the designs for clockwise and anti-clockwise rotation are identical. The direction of rotation can be reversed at a later stage without retrofitting or modifying components.

¹⁷⁾ Higher solids contents on request

²¹ The motor can be supplied by the customer and mounted at the site of installation. Motors supplied by KSB can also be mounted by the customer.

²² On request, customer-supplied motors can be mounted by KSB.

²³ From motor size > IEC 280M or NEMA 444/5T the motor dimensions depend on the make. KSB uses motors made by Siemens. When using other makes or designs the base frame / motor pedestal must be adjusted (special base frame).

³² The motor can be supplied by the customer and mounted at the site of installation. Motors supplied by KSB can also be mounted by the customer.

³³ On request, customer-supplied motors can be mounted by KSB.

³⁴ From motor size > IEC 280M or NEMA 444/5T the motor dimensions depend on the make. KSB uses motors made by Siemens. When using other makes or designs the base frame / motor pedestal must be adjusted (special base frame).

³⁵ If no valve or measuring equipment is selected as accessory the corresponding connection is closed with a plug.

³⁶ Only permissible up to 16 bar [227 psi] (operating pressure)

³⁷ Measuring equipment is supplied with the pump but not fitted. It has to be connected at the time of commissioning of the pump. This connection is closed with a plug when the pump is supplied.

³⁸ The selection of standard variants or special designs will determine whether surcharges or longer delivery times apply.

Specifications required for enquiries/orders

Pump:

- Pump designation
- Maximum and minimum inlet pressure
- Flow rate Q, head H_{total}
- Flange design
- Shaft seal
- Type of fluid handled and fluid temperature
- Solids content
- Direction of rotation / motor position
- Accessories required
- Special inspections and acceptance tests
- Quantity and language of operating manuals

Drive (selected by KSB):

- Type of construction
- Enclosure
- Voltage, frequency, starting method
- Ambient temperature
- Thermal class
- Accessories required

Drive (selected by customer):

- Binding data sheet with motor dimensions and effective speed

Selection charts

Omega / Omega V, 50 Hz, n = 2900 rpm

Omega / Omega V, 50 Hz, n = 1450 rpm

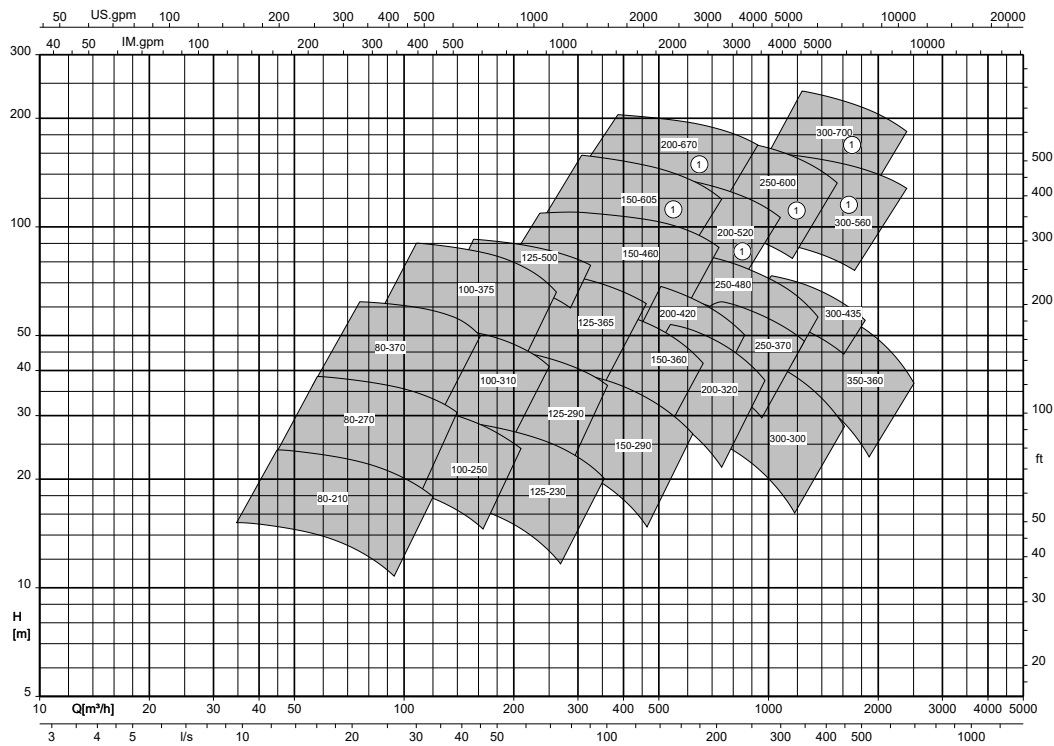

① Pump casing with double volute

Omega / Omega V, 60 Hz, n = 3500 rpm

Omega / Omega V, 60 Hz, n = 1750 rpm

① Pump casing with double volute

Types of installation

Fig.0

Fig. 1: Fig.0: Bare shaft pump

Options of installation parts:

- None

Coupling options:

- Torsionally flexible 3-piece jaw coupling
- Torsion-resistant flexible disc coupling (on request)

Coupling guard options:

- Light-duty design, not tread-proof

Delivery / transport:

- Pump

Coupling guard options:

- Light-duty design, not tread-proof
- Heavy-duty, tread-proof design (on request)

Delivery / transport:

- Up to motor size \leq IEC 280M or NEMA 444/5T or a max. total weight \leq 1500 kg [3307 lb] pump and motor are supplied on the base frame.
- From motor size $>$ IEC 280M or NEMA 444/5T or a max. total weight $>$ 1500 kg [3307 lb] pump, motor and base frame are supplied separately.

3E

Fig. 2: 3E: Pump and motor on a common base frame

Options of installation parts:

- Base frame for pump and motor, including chemical anchors
- Special base frame for pump and motor, including chemical anchors³⁹⁾

Coupling options:

- Torsionally flexible 3-piece jaw coupling
- Torsion-resistant flexible disc coupling with spacer⁴⁰⁾

³⁹⁾ On request only; for motors $>$ IEC 280M or NEMA 444/5T and motors outside KSB standard as well as for other customer-specific versions, special base frame for transporting pump sets with motors $>$ IEC 280M or NEMA 444/5T

⁴⁰⁾ On request only; special base frame required

DB/DK

DB installation

DK installation

DB/DK: motor mounted on the drive lantern

Options of installation parts:

- Pump foundation including foundation blocks and drive lantern
- Pump foundation including foundation blocks and special drive lantern⁴¹⁾

Coupling options:

- Torsionally flexible 3-piece jaw coupling
- Torsion-resistant flexible disc coupling with spacer

Coupling guard options:

- Light-duty design, not tread-proof

Delivery / transport:

- Pump supplied on pump foundation with drive lantern mounted. The motor is supplied separately.

DJ

Fig. 3: DJ: Pump and motor on separate levels

Options of installation parts:

- Pump foundation (foot) including foundation blocks
- Pump foundation (foot) including foundation blocks, motor support frame, foundation rails and foundation bolts (on request)

Coupling options:

- Cardan shaft with/without intermediate bearing (on request)
- Coupling with spacer (on request)

Coupling guard options:

- Light-duty design, not tread-proof

Delivery / transport:

- Pump on corresponding pump foot. Motor and motor support frame are supplied separately.

⁴¹ On request only: for motors > IEC 280M and/or NEMA 444/5T and motors outside KSB standard as well as for other customer-specific versions, special drive lantern for motors > IEC 280M or NEMA 444/5T

DP

Fig. 4: DP: Motor mounted on separate drive lantern

Options of installation parts:

- Pump base frame (foot) including foundation bolts, and drive lantern (including foundation rails and chemical anchors)

Coupling options:

- Torsionally flexible 3-piece jaw coupling
- Torsion-resistant flexible disc coupling with spacer⁴²⁾

Coupling guard options:

- Light-duty design, not tread-proof

Delivery / transport:

- Pump with pump base frame (foot), motor and drive lantern supplied as individual units

⁴² On request only; for motors > IEC 280M or outside KSB standard as well as for other customer-specific versions, special drive lantern for motors > IEC 280M

Scope of supply

Omega (standard design)

- Bare shaft pump (without accessories)
- Casing wear rings
- Shaft sealed by gland packing
- Grease-packed rolling element bearings
- Barrier fluid line / flushing water line made of flexible material, without cyclone separator
- KSB standard coating for indoor installation
- Installation/operating manual

Omega V (standard design)

- Bare shaft pump (without accessories, with pump foundation)
- Casing wear rings
- Shaft sealed by gland packing
- One grease-lubricated and one product-lubricated bearing
- Barrier fluid line / flushing water line made of flexible material, without cyclone separator
- KSB standard coating for indoor installation
- Installation/operating manual

Components for completing the pump set

- For horizontal installation: baseplate / base frame for pump and motor (including foundation bolts)
- For vertical installation: drive lantern stool and foot (including support feet and foundation bolts, depending on the motor size)
- Drive
- Coupling

Coupling guard

Accessories

- Barrier fluid line / flushing water line with cyclone separator
- Vent valves and/or drain valves
- Pressure gauges
- Temperature sensor for rolling element bearings (Pt100)
- Limit switch or transmitter for Pt100
- PumpMeter
- SPM nipple or vibration monitoring device

Shipment/transport and packaging

After the pump sets are completely assembled at the factory to be adjusted to the specific requirements, they are partly dismantled again for shipment. The assembly status a pump set is supplied in depends on the type of pump set, its dimensions and its weight. Pump, baseplate and motor are supplied ex works without packaging. On request, a variety of packaging options can be provided against a surcharge. More information (⇒ Page 20) .
